SPECIAL OFFERING OF PHALAENOPSIS SEEDLINGS IN TRANSPLANTED FLASKS

These 250cc transplanted flasks of Phalaenopsis hybrids average 150 or more vigorous seedlings per flask. While they could be shipped any time in flasks, if you want to save express charges by having them fly to you "BARE ROOT", shipment would not be until April 1st - when the seedlings will be better size for communities. Also, it is generally conceded Spring is the best time to shift them from flask to communities.

BUY NOW for first choice. Your flasks will be tagged for you for April shipment, Bare Root, Air Mail Prepaid, or Express Collect, as you choose. Cash with order, please.

One flask of WHITE Phalaenopsis.....\$15.00
Two flasks of WHITE Phalaenopsis..... 25.00
Three or more flasks WHITE Phalaenopsis, @ \$10.00 per flask.

One flask PH-25, PINK Phalaenopsis.....\$20.00
Two flasks PH-25, PINK Phalaenopsis..... 30.00

OR, ONE FLASK OF EACH cross listed (Two White, One Pink).....\$30.00

Ph-22 PHALAENOPSIS CHIEFTAIN X PHALAENOPSIS CHIEFTAIN - This is not a "self" cross but a cross between two especially fine Chieftains. The pod parent, P. CHIEFTAIN VAR. SAN-MAR-KEN, was a 5½-inch, perfectly formed, round White bloom of extremely good form and substance. P. CHIEFTAIN, VAR. LA PALOMA, the pollen parent, has equally good form and substance, but not quite as large, 4½ inches across. The cross is expected to produce especially grand White blooms.

Ph-23 PHALAENOPSIS CHIEFTAIN X P. DR. HENRY EVERSOLE - The pollen parent is a cross of P. Altadena and P. Winged Victory - the latter fostering many of the top quality White Phalaenopsis hybrids in recent years, including our own P. GRACE PALM, which cross has been walking off with awards all over the country. This was an especially fine pair of PURE WHITE Phals., and should produce more awards.

Ph-25 PHALAENOPSIS DORIS VAR PINK CLOUD X P. DORIS X P. ELINOR - Like all the top quality PINK Phalaenopsis crosses, this one probably won't grow quite as rapidly as the White hybrids, but it will be worth waiting the little extra time to see the blooms! Visualize the fine form and heavy substance of P. DORIS, with the delicate but not faded pink color of a baby's blush. Modern pink hybrids like this are very far removed from the old Schilleriana crosses. Substance and keeping qualities equal the best White crosses. LIMIT: Not more than two flasks of this cross per customer.

DANIEL RYERSON, BOX 805, HOMESTEAD, FLA.

SPECIAL OFFERING OF PHALAENOPSIS SEEDLINGS IN THE FOLLOWING PLANTS

These 25000 transplanted plants of Phalaenopsis hybrids average 100 or more times more seedlings per plant. While they could be shipped any time in 1958, if you want to save expense choose by having them fly to you "FREE ROOST" shipment. You will not be notified until late - when the seedlings will be faster than the common ones. Also, as is generally conceded Spring is the best time to plant them from plants to commercialize.

BUY NOW for first choice. Your plants will be tagged for you for April shipment. Save cost, too, all included, on Express Collect, as you choose. Cash with order, please.

- One plant of WHITE PHALAENOPSIS.....\$15.00
- Two plants of WHITE PHALAENOPSIS.....25.00
- Three or more plants WHITE PHALAENOPSIS, @ \$10.00 per plant.
- One plant of PINK PHALAENOPSIS.....\$20.00
- Two plants of PINK PHALAENOPSIS.....30.00

OR, ONE PLANT ON EACH cross listed (Two White, One Pink).....\$30.00

PH-22 PHALAENOPSIS CHITREIN & PHALAENOPSIS CHITREIN - This is not a "self" cross and a cross between two especially fine Chitrein. The good parent, PH-22 CHITREIN VAR. BARKER-LEN, was a 25-inch, perfectly formed, round white bloom of extremely good form and substance. PH-22 CHITREIN VAR. IN TAILOR, the pollen parent, has equally good form and substance, but not quite as large, 4 1/2 inches across. The cross is expected to produce especially good white blooms.

PH-23 PHALAENOPSIS CHITREIN & PHALAENOPSIS CHITREIN - The pollen parent is a cross of PH-22 CHITREIN and PH-22 CHITREIN - the latter featuring many of the top quality white Phalaenopsis hybrids in recent years, including our own PH-23 CHITREIN, which cross has been waiting off with awards all over the country. This was a especially fine pair of PURE WHITE plants, and should produce more awards.

PH-24 PHALAENOPSIS DORIS VAR PINK WIND X B. DORIS & P. DORIS - Like all the top quality pink Phalaenopsis crosses, this one probably won't grow quite as readily as the white hybrids, but it will be worth waiting the little extra time to see the bloom! Varying the fine form and heavy substance of PH-24 DORIS, with the delicate but not lost in a color of a baby's dress, DORIS VAR. DORIS, like this one very far removed from the old Schlieffen cross. Substance and keeping qualities equal the best white crosses. Like the two other fine plants of this cross per se.
